

APV at Achema 2009

This year APV will attend Achema in Frankfurt, Germany from 11th to 15th May 2009 under the SPX brand together with some of our sister companies: Bran+Luebbe; Johnson Pumps; Lightnin; Airpel; Waukesha Cherry-Burrell; GD Engineering; Plenty Mirrlees and Premier Mill.

Theme

The SPX theme for this exhibition is: "Where ideas meet industry", illustrating how at SPX APV we offer creative ideas and efficient solutions and systems to our customers.

Objectives

One of the most important objectives of APV is to create innovative solutions, giving our customers value for money and helping them to meet the growing global demands for new and innovative products in a responsible way. Throughout APV's long history, our quality and the commitment of our employees has formed the basis of our business. It is important to us that APV stands as an innovative company, which can anticipate customers' needs; we constantly strive to exceed our customers' expectations by developing solutions to our customers' greatest challenges.

APV is a leading supplier of world-class pumps, valves, homogenizers, heat exchangers and automation solutions for the global processing industry.

At ACHEMA in Frankfurt, APV will present a series of first-class components.

The SPX stand in hall 4 (Thermal processes)

Hybrid

Experience the benefits of the APV hybrid - the fully welded plate heat exchanger technology that combines the advantages from the conventional plate heat exchanger with that of shell and tube. Visit us in hall 4 and experience APV hybrid compactness, with less use of materials, liquid and see for yourself its extremely small footprint.

Continues on next page >>

Heat exchangers

The XL plate heat exchanger range from APV is a complete range of XL plate series for heavy-duty applications. Perfection without compromise is a key word – whether you need a power plant utility cooling solution, a lean/rich amine interchanger for gas sweetening, central coolers on board a ship, or anyone of hundreds of other application solutions. Check out APV's Heat Exchanger offerings in hall 4.

Paramine technology

Discover how to overcome your sealing difficulties in gasket plate heat exchangers with the APV Paramine technology which is designed for sour gas found in amines. This technology, which we show in hall 4, can take your plate heat exchanger to new temperature limits.

Pumps

Do you like the idea of low energy consumption, easy maintenance, a wide range of options available combined with the approvals of FDA, EHEDG, 3A and ATEX? Then do not miss the chance to check out the APV W+ and DW pump at our stand in hall 9.

Valves

Is quick, simple and precise adjustment important for you? The APV DELTA MS4 valve with a CU4 control and indication unit is simply the best in class for virtually any air-operated sanitary valve. You can see the new valves and valve controls in hall 9

Homogenizers

APV has been a world leader in the field of homogenizers for many decades, introducing a long line of process innovations enabling significant performance improvements. Now customers can benefit from advances in other areas that deliver decisive advantages in terms of reliability, quality, output and operator-friendliness, as well as lower operating costs. Check the latest homogenizer innovation on our stand in hall 4.

Service

What difference does global service make to customers? The most important thing is that it can help many customers maintain uptime, quality and yield. And the only way to do that is to be available at short notice to every customer, wherever they are in the world. AtACHEMA, however, you'll have to come to us to find out more.

APV is attending the exhibition in two halls:

- Hall 4 (Thermal processes) – stand no. E1-F1
- Hall 9 (Pumps, compressors, valves and fittings) – stand H30-J34

Would you like a unique insight into how innovative ideas can work for you?

SPX is "Where Ideas Meet Industry". We don't just talk about ideas we make them happen. To learn more come and meet us at Achema 2009.
