

TPM+ Mixer Inclusion into the Flex-Mix Family

The TPM+ Mixer is probably the oldest mixer within the APV portfolio. Originally, when invented, it came to be known as the mechanical cow, due to its ability to reconstitute milk powder. Recombination of milk based powder remains the most important application of the TPM+ Mixer.

As a consequence of the W+ pump production transfer to Bydgoszcz (including the TPM+ Mixer) and subsequent uncertainty with regards to commercial and technical ownership, it has been decided to move product management of the TPM+ to Silkeborg. This includes Proposals, R&D and Marketing. This decision is in line with the recent launch of the Flex-Mix Family which the TPM+ mixer is now officially a part of. An added benefit of this decision is our ability to introduce alternatives to the TPM+ in cases where it is not suitable for the requested application (for example Flex-Mix Liquiverter, Flex-Mix Instant).

Our vision for the TPM+ is to enable local configuration and order handling. In due course we will equip the relevant people in the SPX APV organisation with the tools needed to do so. Meanwhile, a technical up-grade will be performed in order to ensure even better performance.

The transfer is with immediate effect. Key contacts for the TPM+ in Silkeborg and the Flex-Mix Family in general are:

- Christian Kjoelby – Global Technology Manager, Mixing & Blending
Direct telephone: +45 8922 8106,
Email: christian.kjoelby@apv.com
- Ulla Skytte - Technical Sales Manager, Mixing & Blending
Direct telephone: +45 8922 8152,
Email: ulla.p.skytte@apv.com
- Conni Hjorth – Proposals
Direct telephone: +45 8922 8309,
Email: conni.hjorth@apv.com

The transfer from Kolding also includes our static mixer Flex-Mix TPX.

Please direct any questions and comments regarding the Flex-Mix range to me.

Further information about the Flex-Mix range is available on APV NOW, Marketing Downloads Database (DAM) or <http://apv-now.spx.com/marketing/launches/internal/flexmix/flexmix.htm>.
